## PROFILE

As a Fullstack Developer (Laravel), I specialize in crafting engaging and user-friendly interfaces while seamlessly integrating robust back-end functionality. I have expertise in transforming design concepts into interactive web experiences using front-end technologies like HTML, CSS, JavaScript, and React, complemented by back-end proficiency in Laravel.

## SKILLS

- HTML / HTML-5
- CSS / CSS-3
- JAVASCRIPT
- JQUERY
- BOOTSTRAP
- Tailwind
- REACT JS
- REDUX
- GITHUB
- PWA
- Laravel

## EXPERIENCE

### Front-End Developer

Present

#### GFE-Group business

- Designed and implemented user-friendly web interfaces using HTML, CSS, JavaScript, React, and Laravel Blade templating. Collaborated with back-end developers to integrate APIs and database functionality using Laravel, ensuring seamless and secure data flow. Built and maintained RESTful APIs in Laravel to support dynamic web applications.

## PROJECTS

### STARBUCKS CLONE

[View](#)

- Starbucks is a globally renowned coffeehouse chain that has become synonymous with premium coffee and a welcoming atmosphere. With a commitment to providing high-quality, ethically sourced coffee, Starbucks offers a diverse menu of beverages and food items. The brand is recognized for its distinctive green logo, cozy cafes, and a unique coffee culture that fosters community and connection.

### GFE-PORTAL

[View](#)

- GFE-Group Business is a prominent company specializing in import and export services, facilitating the global trade of diverse goods and products. With a commitment to excellence and reliability, GFE-Group connects suppliers and buyers across international markets, ensuring seamless transactions and efficient logistics. Their flagship project, the GFE Portal Website, serves as a comprehensive platform for managing trade operations, offering real-time updates, and streamlining the import-export process for enhanced business performance.
